

Stacey M. DeVecchio
Representative to the Society Nomination
Committee Region Representative
Section: Central Illinois Section

As a 22 year SWE veteran, fellow and life member, I am committed to the society's goals and have proven that I can deliver results. I have been involved in all aspects of SWE leadership from section leadership, to region leadership to committee leadership and on to society president. I know first-hand what's needed for the various positions. I also know the importance of staying relevant and why we need to

evolve in how we do business. The early discussion to change our governance started during my time on the board of directors and I have continued to stay up to date on the progress in this area since then.

I have extensive knowledge of SWE from my participation in numerous committees, including the Awards & Recognition Committee, the Conference Programming Board, the Corporate Partnership Council, the COR Governance and Mega Issues FIGs, the Strategic Planning Committee, and the Finance Committee

Professionally, I am the Additive Manufacturing Product Manager for Caterpillar Inc. where I leverage the technology in all spaces, including New Product Introduction, supply chain and operations. In my 28 years at Caterpillar, I've held numerous positions in engineering and manufacturing. I hold a B.S. in chemical engineering from the University of Cincinnati.

If elected, I plan to be a good nominating committee member and vet the appropriate person for the slate. With my extensive society experience I also can provide leadership and perspective during these transition years.
