

Stephanie Foegen Lieutenant Governor

Section: Chicago Regional

Stephanie Foegen has been involved in Region H leadership since she was president of the Chicago Regional Section in FY13. Her previous experience at the local level includes serving as recording secretary in FY11 and treasurer in FY12. Stephanie went on to serve as a Section Representative in FY14 and FY16 and as an Alternate Section Representative in FY15 and FY17 while transitioning into additional leadership roles within Region H. Her efforts in the new role of Region H Mentor Program Coordinator earned her a Governor's Choice Award in 2014 entitled "Leadership Pipeline Builder." Stephanie has also been involved with the Region H Conference Planning Committee, working to ensure the very best possible conference experience for the 700+ attendees. Her familiarity with many leaders within the region helped during her role as Region H Nominating Committee Chair in FY15.

Stephanie's involvement at the Society level began on the Local Host Committee for WE11, where she developed a system for assigning the over 400 volunteers necessary for conference.

She has been involved on the Awards committee since FY14, coordinating the Emerging Leader Award and contributing to the development of new awards. This past year Stephanie worked with the Senate Strategic Initiatives Committee to co-author a white paper entitled "Male Diversity Partners."

Stephanie also enjoys speaking at SWE conferences, especially on topics that allow her to advocate for work-life integration. She is passionate about providing a supportive environment for all STEM professionals to find success on their own terms through all stages of professional and personal development.

Stephanie began working for Ambitech Engineering in 2011 as an Instrumentation and Controls Engineer. Stephanie moved into the Estimating department in 2013, as well as contributing in the area of Project Controls where she enjoys making use of her computer engineering degree by automating and standardizing client reporting.

Stephanie is excited to be able to continue to serve Region H as we enter a time of transition and growth in the society. Stephanie hopes to provide guidance and support in her role as Lt. Governor and find new ways to involve collegiate members and support up-and-coming leaders for the society as we transition to WELocal conferences, including next year's conference to be held in Madison, Wisconsin.
